The Miracle of Death
By Betty J. Kovács, Ph.D.

The extraordinary experiences of her entire family, along with decades of research on the central role that death has played in cultures throughout history, allow Dr. Kovács to speak with authority on what we MUST learn about death in order to grow and to survive as a species.

Within three years Dr. Betty Kovács lost her mother, her son and her husband in three separate automobile accidents.

The Miracle of Death is a true story of precognitive dreams, visions, and synchronistic events surrounding death that opened her family to multiple levels of reality, the interconnectedness of all life, and the evidence all around us that a planetary shift in consciousness is under way.
